PROFESSIONAL EXPERIENCE

I have worked on both new and legacy software with data sensitive clients in the regulated sector.
- Developed a dashboard for a council for their handling of their care clients. Sole FE developer on this project.
- Maintained and added features to a variety of legacy products we have for high street banks. Involved in both FE and BE (Node, SQL, AWS) tasks.
- Currently working on rewriting an existing internal form for one of our bank clients. This multipage form is in AngularJS and integrates into their Salesforce software. Both Project Manager and Frontend Developer on this project.

Skills used almost daily:
React, AngularJS, JavaScript, Typescript, Git, MUI, Redux, SQL, Node, HTML, CSS

Platforms/Software used:
AWS, Jira, Bitbucket, Azure, Figma

WORK HISTORY

Frontend Developer at Davies UK   **July 2022 - now**
See above for more information on experience gained in this role. Started as a junior developer.

Before moving into IT, I have worked in various sectors.
- I worked 6 years as a self-employed FX trader, whilst raising our 3 children. 2015 – 2021
- I managed two farms, first in the UK and then one in France. 2009 – 2015
- I spent many seasons in the snow, working as a snow sports instructor in Austria and New Zealand. This included leading groups in high-risk off-piste areas and introducing them into the dos and don'ts of backcountry skiing. 2007 – 2009
- I have spent 7 years in Spain where I managed and co-owned a small hospitality group with various outlets. I was responsible for all front of house and all our team members. Our team grew to about 70 members in high-season and my responsibility for them extended from working to non-working hours as most of them would come over from the UK and the Netherlands to work. 2001 – 2007

SKILLS

Coding: Typescript / JavaScript / React / AngularJS / CSS / Git / SQL / HTML
Tools: Azure / Bitbucket / Jira / Figma / AWS
Soft: Problem solver / Team player / Agile / Project Management
Languages: Dutch native speaker / German fluent / English fluent

EDUCATION

- Completed a range of online courses from HackerRank, freeCodeCamp, Tech Learning Network, and LinkedIn, acquiring vital skills in order to get into in my current role. Details available in my portfolio or LinkedIn profile.
- Prior to commencing my current role, engaged in several personal projects utilizing diverse libraries and frameworks such as React, Next, and Remix. Accessible through my portfolio, these projects demonstrate my proficiency.
- Presently engaged in the development of an eCommerce platform for a family member, employing technologies like TypeScript, React, Tanstack Query, Material UI, React Hook Form, Zod, Stripe, and Firebase hosted on Netlify. Find the project on my GitHub ("market garden").
